ELECTROMAGNETIC RADIATION & WIRELESS

Not Smart Smart Meters

As new legislative sessions commence across U.S. states, elected officials are in the process of proposing and sponsoring bills.

And like clockwork, in some states, informed consumers will continue to attempt to secure the right to opt out of wireless smart utility meters, again.

In other states, the battle has already been waged.

For environmental justice, human rights, and scientific integrity, even when opt outs have been achieved, it has not gone well.

More to the point, issues around the installation of smart meters never should have been reduced to the question of whether or not or how to accommodate those seeking protection from harm but should have been a catalyst for addressing decades-old unfounded assumptions regarding the safety of wireless applications.
